Article Guidance

Article Text:

The information in this article contains billing, coding or other guidelines that complement the Local Coverage Determination (LCD) for Lab: Flow Cytometry (L34513).

Flow cytometry is a complex laboratory process to examine body fluids, including blood and cerebrospinal fluid (CSF); bone marrow; and components of the lymphoreticular system, such as lymph nodes, tonsil, and spleen. The use of peripheral blood and fine needle aspirate material avoids more invasive procedures for diagnosis. LCD L34513-Flow Cytometry outlines the coverage criteria for flow cytometry testing. When covered, testing is limited to no more than 24 markers without additional medical necessity documentation.

Flow cytometry for the detection and/or identification or enumeration of bacteria or viruses in patients with chronic rhinosinusitis with or without polyps is investigational/experimental and is not a Medicare benefit.

To report a Flow Cytometry service, please submit the following claim information:

- Select the appropriate CPT® code
- Enter 1 unit of service (UOS)
- Select the appropriate ICD-10-CM code

Bill Type Codes:

Contractors may specify Bill Types to help providers identify those Bill Types typically used to report this service. Absence of a Bill Type does not guarantee that the policy does not apply to that Bill Type. Complete absence of all Bill Types indicates that coverage is not influenced by Bill Type and the policy should be assumed to apply equally to all claims.

Revenue Codes:

Contractors may specify Revenue Codes to help providers identify those Revenue Codes typically used to report this service. In most instances Revenue Codes are purely advisory. Unless specified in the policy, services reported under other Revenue Codes are equally subject to this coverage determination. Complete absence of all Revenue Codes indicates that coverage is not influenced by Revenue Code and the policy should be assumed to apply equally to all Revenue Codes.
